

### ***The plot:***

Robots will be placed inside the circular ring of specified diameter. The robots will be set down in such a way they can face each other. The bots have to force each other out of the ring.

### ***Robot specification:***

1. Robot must be manually controlled.
2. The maximum weight of robot can be 6 Kg; robot must be fit within a box of 30x30x40 cc.
3. Robot should not have any sharp edge, cutting tools or any damaging tool so that it may not harm the opponent robot.

### ***Rules:***

1. A team may have 1-4 contestants. Only one contestant can operate the robot for the whole match.
2. When both contestants are ready, the ring judge will signal the start of the 3 minute round at which time the robots may be activated (you may physically flick a switch on your robot). No movement must occur before the official start (No posturing).
3. There will be three rounds in a match each of three minutes.
4. If both the teams will not be able to finish the round within three minutes then Round will be tie up.
5. A robot will be considered to be removed from the ring, when any of its wheels or legs are over the edge and its centre of mass begins to tip.
6. A robot whose body hangs over the edge is not considered 'off' until it physically tips off the edge and touches outside ring. **JUDGEMENT OF THE RING OFFICER WILL BE FINAL.**

7. If both robots will stuck in an entanglement or deadlocks, then the clock will be stopped and the judges will ask the contestants if they want to restart. If yes, then robots will be placed from the robot's starting position. Both players must agree to this, if not, round continues as normal.
8. At the end of each match the contestants are responsible for making sure the ring is clean and ready for the next round to the satisfaction of Judges.
9. The robot may not allow to touch anything outside of the ring (with the exception of the operator's control cable which should be lagging always).
10. Intentional damage or interfering with the opponent operator is not allowed. Those electronic items are not allowed which may harm opponent robot.

### ***Points:***

The points will be awarded on the following basis-

1. The contestant wins the round : 2 points will be awarded
2. The contestant ties the round : 1 point will be awarded
3. The contestant loses the round : 0 point will be awarded
4. The team who accumulate the most point will make the final where 1st, 2nd and 3rd place will be decided by round robin
